

HOW TO INSTALL PYTHON

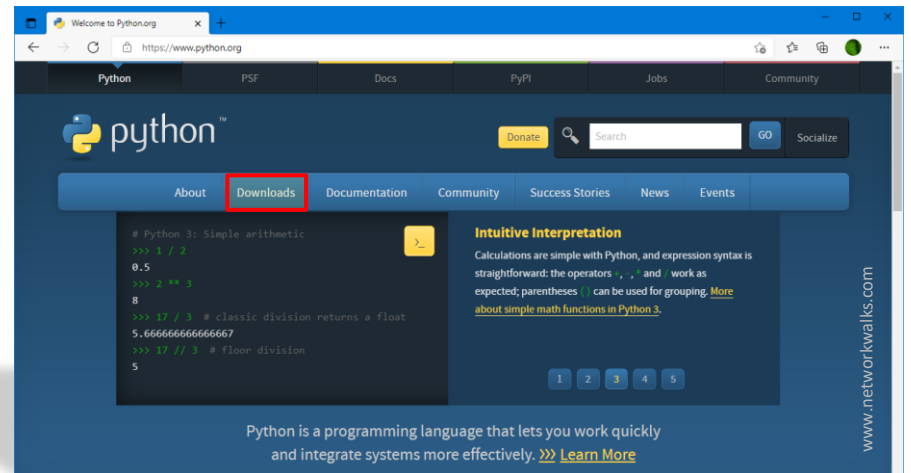

Many PCs and Macs will have python already installed. To check if you have python installed on a Windows PC, search in the start bar for Python or run the following on the Command Line (cmd.exe):

```
C:\Users\user11>python --version
Python 3.7.6

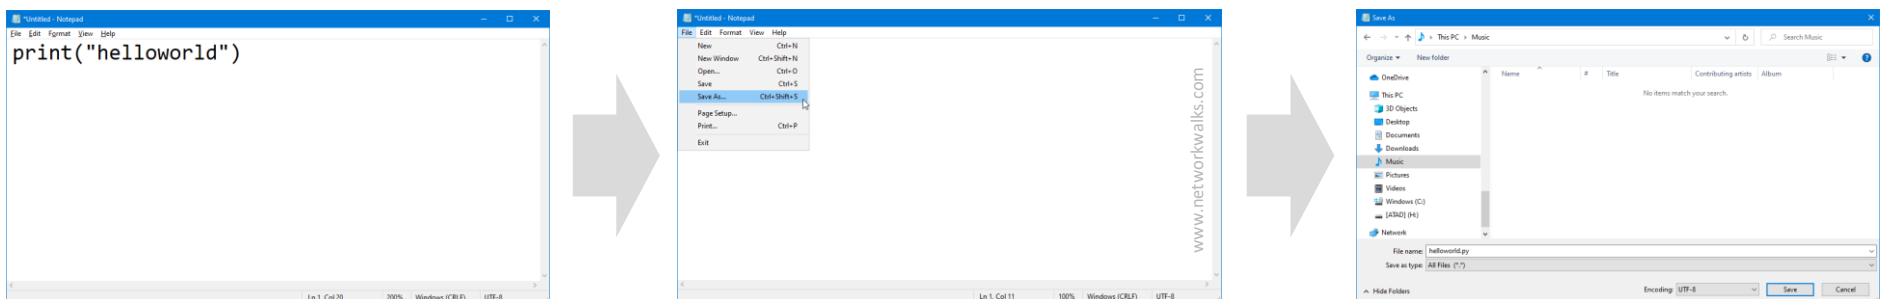

C:\Users\user11>
```

If you find that you do not have python installed on your PC, then you can download it for free from the official website: www.python.org

HOW TO CREATE A PYTHON FILE

- 1 Open Notepad or any text editor
- 2 Write your python code
- 3 Save your file with .py extension

HOW TO OPEN A PYTHON FILE

- 1 Open CMD on your windows PC
- 2 Type python & file path with name & .py extension

Congratulations! you have written and executed your first Python program.
